No. B.—6669 of 1909.

Office of the Surgeon-General with the Government of Bombay,
Poona, 12th August 1909.

From

Surgeon-General H. W. STEVENSON, I. M. S.,
Surgeon-General with the Government of Bombay;

To

The SECRETARY to GOVERNMENT,
General Department, Bombay.

Sir,

I have the honour to submit, for the information of Government, the Annual Report on the Civil Hospitals and Dispensaries of the Bombay Presidency for the year 1908.

2. The changes in number, which have occurred during the year in the different classes of Civil Medical institutions, are set forth in Statement A.

3. The total number of patients treated during the year amounted to 2,202,941, showing an increase of 19,122 over the figures for 1907. Of these patients, 2,135,772 were treated in General Hospitals and Dispensaries, and 67,169 in Hospitals and Dispensaries maintained for the treatment of women and children only. In these latter, the increase of patients was 4,442 over those treated in 1907.

4. The following figures give the results of treatment among in-door patients during the year:—

Cured	32,381
Relieved	6,012
Discharged otherwise (including absented) ...	4,822
Died	5,246

The percentage of mortality fell from 10·1 in 1907 to 9·9 in 1908.

The total number of beds available was 5,606, and the daily average number of patients treated was 2,877·1.

5. The attendance of out-door patients exhibits an increase of 16,433 over that of 1907.

6. For facility of reference, the admissions from principal diseases and their ratio per cent. to the total treated during the years 1908 and 1907 are compared in the subjoined table:—

Diseases.	1908.		1907.	
	Total treated.	Ratio per cent.	Total treated.	Ratio per cent.
Small-pox	1,194	·054	373	·017
Dysentery and Diarrhœa	81,613	3·7	83,796	3·8
Malarial Fevers	422,570	19·2	397,091	18·2
Venereal Diseases	44,274	2·0	44,323	2·0
Rheumatic Affections	53,284	2·4	55,580	2·5
Worms	137,411	6·2	136,876	6·3
Debility and Anæmia	22,513	1·0	20,817	1·0
Tubercular Diseases	9,149	0·42	8,016	0·37
Diseases of the Nervous System ...	57,156	2·6	42,418	1·9
„ of the Eye	230,705	10·5	237,275	10·9
„ of the Ear	97,571	4·4	94,793	4·3
„ of the Respiratory System other than Tubercle of Lungs	128,049	5·8	128,429	5·9
Dyspepsia	59,020	2·7	60,203	2·8
Other Diseases of the Digestive System ...	198,274	9·0	195,614	9·0
Other Diseases of the Generative System ...	24,688	1·1	26,667	1·2
Diseases of the Connective Tissue ...	54,073	2·4	52,327	2·4
Skin Diseases (including Ulcers) ...	237,693	10·8	241,457	11·6
Injuries (General and Local)	116,980	5·3	112,809	5·2

It will be noted that there is an increase in the number of cases of small-pox, malarial fevers, tuberculosis and diseases of the nervous system.

The great majority of the cases of small-pox were treated in the different institutions in Bombay City where the disease was epidemic for some months of the year.

In all parts of the Presidency, as shown by the returns, the people suffered more severely than usual from malarial fevers, notwithstanding the fact that more accurate and scientific means of diagnosis have the result of eliminating from the returns doubtful cases, which were formerly returned as malarial fevers.

The increase in tuberculosis is chiefly marked in Sind, the Deccan and Gujarát. A portion of this increase is no doubt due to more accurate diagnosis than was possible before a knowledge of bacteriology, and the regular use of the microscope, became the rule, but even allowing for this, there is unfortunately good reason to believe that the disease is actually on the increase among certain sections of the population.

Diseases of the nervous system appear to be on the increase among all civilized peoples.

Among the more rare affections treated during the year may be noted several cases of acute yellow Atrophy of the Liver and one case of Leishman Donavan Infection (all of which proved fatal), treated in the Jamsetji Jijibhoy Hospital, Bombay, and two cases of Actinomycosis reported from the West Hospital, Rájkot.

7. The surgical work done during the year amounted to a total of 82,044 operations, showing an increase of 321 over those for 1907. Of these, 11,008 were performed upon in-door patients, and 71,036 upon out-door patients.

The death-rate amongst operation cases amounted to 3·4 per cent. as compared with 4·4 in 1907. When it is remembered that very many of the cases enter hospitals and submit to operation only as the very last resource, these results must be considered to be very satisfactory.

As usual, operations for the removal of vesical calculus (1,271) are more numerous than any other, though fewer were performed than in 1907 (1,401). As the equipment of different hospitals is improved, the operation of crushing and washing out the stone is almost entirely resorted to.

Operations for the extraction of cataract come second in numbers. 1,241 of these were performed, of which 979 were at the Cowasji Jehangir Ophthalmic Hospital in Bombay, and 115 in the Civil Hospital at Ahmedabad.

Amputations numbered 665 cases with 37 deaths.

With improved means of carrying out aseptic work, operations involving the opening of the abdominal cavity are increasing in number. Patients are also resorting more freely to hospitals for the performance of operations of convenience, such as the radical cure of hernia. Women also are taking advantage, in a much greater degree, of the means offered to them for relief from diseases peculiar to their sex. Among them, operations other than obstetric, in which the abdominal cavity was incised, or punctured, numbered 238 cases with 15 deaths, as compared with 66 cases and 13 deaths in 1907.

Obstetric operations of importance numbered 344 with 21 deaths. The mortality among parturient women is known to be very great among the general population, and many of these cases come to hospitals after every other known means of relief has been tried and failed. The condition then is one which is not conducive to successful operative work. There is a need for the establishment of more maternities in connection with the Civil Hospitals. The poorer classes soon learn to come to them and appreciate their advantages.

Much has been done by Government during the past two years to improve the equipment of hospitals and to bring them more up to date. In most, the means are now available, so far as instruments and appliances are concerned, for good aseptic surgery. The want which remains to be supplied is that of good nursing and attention after operation. The lack of this, in most mofussil Civil Hospitals, is severely felt.

8. The total income, exclusive of the cash balance, amounted to Rs. 18,74,621. Of this, Rs. 10,67,395 were received from Government. Whilst there was an increase in the contributions from the Municipal Funds, those from Local Funds showed a decrease, as compared with the previous year. The interest on invested capital yielded Rs. 34,771. There was an increase of Rs. 5,802 in the amount of subscriptions from Europeans and Natives. The receipts from paying patients amounted to Rs. 82,899, and Rs. 35,927 were obtained from miscellaneous sources.

The total expenditure was Rs. 18,79,239. Deducting therefrom the sum of Rs. 1,12,104 remitted into the treasury on account of hospital fees, sale proceeds of unserviceable articles, &c., &c., and Rs. 35,900 invested during the year, the net cost was Rs. 17,31,235, and the cost per patient Re. 0-12-8, as compared with Rs. 15,22,699 and Re. 0-11-4 respectively in the year 1907. The cost of each diet averaged Re. 0-2-11, or pies 2 more than in the previous year. Government paid Rs. 9,55,291, or 55·2 per cent. of the total expenditure, against Rs. 8,28,898 or 54·4 per cent. in 1907.

The percentage of the total cost paid by Government for the State-public Institutions was 85·8, for the Local and Municipal Fund Institutions 20·5, and for the Private-aided Institutions 30·2, as compared with 83·9, 22·7 and 28·7 respectively in 1907. The cost per patient in each of these three classes was :—

	1908.			1907.		
	Rs.	a.	p.	Rs.	a.	p.
State-public	2	7	3	2	1	5
Local and Municipal Fund Institutions ...	0	7	1	0	6	4
Private-aided	0	13	3	0	14	4

9. On the 1st January 1908 the invested capital of these institutions stood at Rs. 9,15,700. During the year, Rs. 35,900 were invested, and securities worth Rs. 5,800 were sold and withdrawn, leaving a balance of Rs. 9,45,800 on 31st December 1908.

10. Of snake-bite 82 cases were reported during the year 1908. These have already been commented on in a separate report.

11. For the treatment of Leprosy by "Nastin," Government gave a special grant of Rs. 1,000 to the Acworth Leper Asylum at Mátunga (Bombay) and of Rs. 600 to the Kagrapeth Leper Hospital at Ahmedabad during the year 1908. The reports of the officers using this treatment are encouraging. Though no cure is yet reported, many cases have certainly been relieved.

12. The special allotment of Rs. 1,13,750 which Government were pleased to place at my disposal for the equipment of Civil Hospitals during the year 1908 was fully expended.

13. The construction of the "Sir William Moore's Operating Theatre" in connection with the Jamsetji Jijibhoy Hospital, and the new extension to meet the increased demand for in-door treatment at the Cowasji Jehangir Ophthalmic Hospital, Bombay, were completed during the year.

The Belgaum Civil Hospital was transferred to the new buildings which were opened by His Excellency the Governor of Bombay on 17th October 1908.

At Ahmedabad the erection of a Nursing Home is still in progress. The plans and estimate for the proposed Naoroji Maternity and General Hospital for Parsis and Europeans, towards the construction of which Khán Bahádur Naoroji Pestonji Vakil, C.I.E., has increased his original offer of Rs. 15,000 to Rs. 26,127, are under consideration of Government.

The new Civil Hospital at Karáchi was completed during the year.

At Ahmednagar the new Operation Theatre was completed and brought into use, whilst those in connection with the Bijápur and Hyderabad (Sind) Civil Hospitals were nearing completion at the close of the year under review.

14. The offer of Rs. 10,000 from Mr. Bapoo Purushottam Joshi towards the construction of a dispensary at Pravarasangam of the Nevása Táluka in the Ahmednagar District to be named the "Toka Dispensary" was accepted by Government on certain conditions, and the institution was started during the year 1908.

A dispensary at Vanki Bordi in Surat was erected by Dr. Barjorji Byramji (who presented the site and gave a donation of Rs. 23,300 in memory of the late Dr. Byramji Pestonji), and brought into use on 1st April 1908.

The long felt want of a dispensary at Dhond was met by the generous offer of Mr. Krishnarao Raghupati who handed over his property for the purpose, and the institution commenced its work on 26th July 1908.

I have the honour to be,

Sir,

Your most obedient Servant,

H. W. STEVENSON,

Surgeon-General, I. M. S.,

Surgeon-General with the Government of Bombay.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT A.

Showing the number of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1908.

[Total Population of the Province—25,424,235.]

Class of Civil Hospital and Dispensary.	Number open on 31st December 1907.	Number opened during the year 1908.	Number closed during the year 1908.	Number open on the last day of the year 1908.	Remarks.
1	2	3	4	5	6
I.—State – Public ...	48	(*a*) 1	...	49	(*a*) Ahwaz (Persian Gulf).
II.—State—Special—					
(i) Police ...	3	(*b*) 1	...	4	(*b*) Jalgaon Police Hospital (East Khándesh).
(ii) Forests and Surveys ...	2	...	...	2	
(iii) Canals ...	3	...	...	3	
(iv) Others ...	13	...	...	13	
III.—Local and Municipal Funds	254	(*c*) 9	...	263	(*c*) Fort Dispensary (Bombay City), Karjat (Kolába), Málvan (Ratnágiri), Manchikeri and Kumbharvada (Kánara), Dhond (Poona), Pravara Sangam (Ahmednagar), Vánki Bordi (Surat) and Shahpur (Ahmedabad).
IV.—Private—Aided ...	10	...	...	10	
V.—Private—Non-aided ...	325	(*d*) 18	(*e*) 16	327	(*d*) 5 in Thána District, 2 each in Sátára and Kaira Districts and Káthiáwár Agency and 1 each in Bombay, Ratnágiri, Poona and Sukkur Districts and Sávantvádi, Kaira and Mahi Kántha Agencies. (*e*) 4 in Pálanpur Agency, 3 each in Thána District and Káthiáwár Agency, 2 in Sávantvádi Agency, and 1 each in Ratnágiri and Sholápur Districts and Kaira and Mahi Kántha Agencies.
VI.—Railways	46	(*f*) 1	...	47	(*f*) Londa (Southern Mahratta Railway).
Total ...	704	30	16	718	

CLASSES I AND II.—These include all institutions maintained by provincial funds and under Government management. The fact that an institution possesses endowments or receives contributions from local funds or private subscriptions has not been regarded as a reason for not classing it as 'State', when provincial and imperial funds are practically responsible for all the charges connected with it. Class I—'Public' are State Dispensaries which are open to the poorer classes of the public. Class II are State dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

CLASS III.—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or municipal funds. The fact that such an institution is aided by private subscriptions, or receives assistance from Government in the shape of part of the salary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when its existence is practically dependent upon local funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries, whether maintained by State railways or others.
